APRIL 22—EARTH DAY ANNUAL FIRE INSPECTIONS

Our Facilities team did a great job all winter keeping everyone warm and safe and are now gearing up for spring. We have completed approximately 1100 work orders in the month of March and accomplished that with no lost time accidents. Great job! The team also completed 102 set-ups for events that included: Explore More, Middle East Team Visit and Junior Open House.

Weekly Safety Tips/Tool Box Talks:

March 1, 2016 “Normal Wear On Extension Cords Can Loosen Or Expose Wires”

Safety Response:

Extension cords that are not 3-wiretype, not designated for hard-usage, or that have been modified, increase your risk of contacting electrical current. Use only equipment that is approved to meet OSHA standards.

March 7, 2016 “Do Not Use Generators Indoors”

Safety Response:

If you need to use a generator, be sure it is located outdoors, in a location where the exhaust gases cannot enter a home or building. Good ventilation is key.

March 14, 2016 “Clear Area In Front Of Electrical Panels And Breaker Boxes”

Safety Response:

OSHA requires that a clearance of 36” in front of an electrical panel. This means no storing of any items in front of electrical panels at any time.

March 21, 2016 “Visually Inspect Electrical Equipment”

Safety Response:

Notify supervisor of any defective equipment or cords, remove from service until cord is re-
